

PatientPartner

Technology That Leverages
Real Patient Connections

2026

What Do We Know

68%

of patients say they would be **more likely to start a treatment** if they could **talk to someone who's already been on it.**

Accenture Life Sciences: "The Patient is In" Report, 2016

1 in 4

patients **abandon their new prescriptions** if they don't begin treatment within **two days of diagnosis.**

IQVIA Medicine Use and Spending in the U.S., 2020.

#1

Driver of **patient trust** is hearing from "**Someone who's walked in my shoes**" when making healthcare related decisions.

Edelman Trust Barometer, 2025

Why Does This Matter?

Driving brand awareness is essential

but guiding them to a human connection can make the difference between action and attrition.

Industry Partners Benefits

Marketing Teams

We help new patients **understand the benefits of your product** by connecting them with experienced mentors, boosting patient awareness.

- ✓ New Patient Starts
- ✓ Patient Education
- ✓ Script Lift

18%

Patient Service Teams

We provide newly prescribed patients a mentor during the onboarding process to **increase drug & treatment adherence**.

- ✓ Drug Adherence
- ✓ Onboarding Experience
- ✓ Brand Loyalty

22%

Increase in treatment adherence when brands use PatientPartner's mentor program

Go To Market

How will prospective patients learn about this program?

PatientPartner effortlessly integrates with your direct-to-patient initiatives, ensuring a smooth and accessible experience for new patients to engage with the program. Here are a few examples:

01 Brand Website

PatientPartner's implementation team can work with your AOR to integrate this offering on the patient website.

02 Hard Marketing Material

PatientPartner can assist with redesigning hard marketing material, such as patient brochures, starter kits, hand-outs, etc.

03 Specialty Pharmacy

Leverage the distribution channels of your SP by adding a postcard about the mentorship program into the box before the package is shipped.

05 Patient Services Tools

For brands with a patient services website, HUB, or portal, PatientPartner seamlessly integrates into these channels, enabling currently prescribed patients to connect with a mentor effortlessly.

06 Patient Navigators

If the brand employs patient managers (PAL/PEM/PEL, etc.) to support the treatment journey, PatientPartner can provide training to ensure they maximize the mentorship program's potential. Additionally, the technology seamlessly integrates with existing operating systems for a streamlined workflow.

How it Works

PatientPartner turns brand.com traffic into real patient action through fast, compliant, and trusted peer mentorship.

The Patient Flywheel

1. Incoming Patient

A patient struggling with a condition seeks trusted resources and treatment options.

2. Mentor Match

The patient is matched with a trained mentor who has lived experience with the same condition.

3. Treatment Insights

Through real conversations, the patient learns about relevant treatment options and what to expect.

4. Behavior Change

With renewed confidence, the patient takes action—whether it's booking a consult, refilling a prescription, or asking their doctor about a new therapy.

5. Personalized Treatment Pathways

The patient either initiates a new prescription or remains adherent to their existing treatment, based on their needs and goals.

6. Progress

The patient improves their health or continues their treatment journey with increased confidence and consistency.

7. Patient Becomes Mentor

Inspired by their own experience, the patient returns to the platform to help guide others through similar journeys.

Setting a New Standard in Patient Mentorship

Peer to peer mentorship isn't a new concept

Mentorship programs linking past and current patients have long been a staple in healthcare, promoting support and trust.

Companies that utilize mentorship programs:

The PatientPartner difference

PatientPartner offers a **more efficient** and **impactful approach** compared to standard pharmaceutical mentorship programs.

	Other Mentorship Programs	PatientPartner
Waiting Time	6 Weeks to chat with mentor	6 Hrs 48 Hrs to chat with mentor
Patient Drop-Off Rate	35% patient drop off rate	100% mentor match rate
Scope of Reporting	No Insights to conversation context	Real-time Metrics on convo. topics & next steps

How We Impact Your Media Tactics

PatientPartner Prevents Demand Attrition

You Drove the Click—We Drive the Start

Media spend gets patients to the website, but many don't convert due to fear, confusion, or lack of trust. PatientPartner inserts real patient mentors into that moment to help guide the decision—bridging the empathy gap that media alone can't close.

Boost your ROI without breaking the budget

This isn't about increasing spend—it's about maximizing the impact of every dollar you're already investing. By converting more of the traffic you're driving, we boost your KPIs and improve patient outcomes without stretching your budget.

Patient Data To Improve Your Marketing

PatientPartner can provide meaningful first-party data on what patients ask, where they get stuck, and what drives them to convert or fall off—insights that can optimize media messaging, landing page strategy, and overall funnel performance.

How we impact your baseline metrics

INCREASE	DECREASE
▲ Time-on-Site	▼ CPM
▲ Page Visits	▼ Bounce Rates
▲ Engagement Rate	▼ Abandonment Rates
▲ Click Through Rates	▼ Time to Conversion
▲ Conversion Rates	▼ Opt-out/Unsub Rates

Deeper attribution showing direct impact on **new patient starts, abandonment, and adherence**

Customer & HCP Testimonials

PatientPartner unites **patients**, **providers**, and **pharma** around a common goal

Creating a new standard of personalized care that goes beyond the 'click'

“Patient Partner is a unicorn in the industry, setting a new standard with their clear dedication to the mission of positively impacting patients' lives through innovation and compassionate support.

- VP at Sobi Pharmaceuticals

”

“I don't even know where to send patients most of the time, if I knew I could send them to brand.com to get connected with a mentor and close the gaps on navigation, I'd 100% do it if the treatment was the right treatment.

- MD Exec at UNC Health

”

“PatientPartner fills a unique gap for our product—epilepsy patients are really hesitant to try new medications; they've tried 8-10 or more. Our product has much better efficacy but patients are fearful of trying something new. PatientPartner helps patients overcome that fear.

-Director of Patient Marketing at SK Life Science

”

Success Metrics

This is an example of a rare disease brand that leverages PatientPartner's technology to directly enhance their DTC tactics and marketing spend.

User Data

40%

of new sign-ups are non-users of DRUG-A

84%

of those considering switching cite continued symptoms as the reason for the switch

81%

of non-users are considering switching to DRUG-A

Success KPIs

100%

of mentees plan on starting or continuing treatment with DRUG-A after their mentor conversation

72%

of mentees indicated they 'Strongly Agree' that their mentor made them feel more comfortable starting or continuing treatment.
